DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 20-54 are rejected under 35 U.S.C. 102(e) as being anticipated by Na et al. (US6504996).

Regarding claims 20,29,37-38,46-47 and 52-54, Na discloses the method of selectively inserting program managing information (shown as a navigation pack) into a reproduced transport stream (col.4 ll.43-51)

Regarding claims 21, 31, 39 and 48, Na shows in fig.3, generating and inserting the program managing information in the form of a transport packet where the navigation pack is the transport pack (col.5 ll.14-32)

Regarding claims 22-23, 32,40 41,and 49, Na shows that the generated transport packet is inserted between two points containing no audio /video packets between them (col.4 ll.23-42) where it is discussed that the navigation pack, which is part of a transport stream, includes disc search information, and when a search is done on a disc, no audio or video is present.

Regarding claims 24.33,42 and 50. Na shows that the generated transport packet is inserted between transport packets in the reproduced transport stream (col.8 ll.17-44)

Regarding claims 25,34,43 and 51, Na shows that the recording medium is an optical disc (202) in fig. 2

Regarding claims 26 and 44, Na shows tat the transport stream is an MPRg-2 transport stream (col.6 ll.17-21)

Regarding claims 27-28, and 35-36, Na shows that the inserting and reproducing step is performed within an optical disc player in fig.2 (col.4 ll.10-16)

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
